

PHOS-CHEK® FOAM TOTE TRAILERS

DESCRIPTION

PHOS-CHEK® Foam Tote Trailers allow large quantities of foam concentrates to be deployed at a moments notice. Standard trailers come in single, double, and triple totes. All trailer sizes are designed to allow for superior mobility so that the user can deploy the unit for rapid response and quick extinguishment. A mounted monitor set up allows the user to draw foam concentrate directly from the tote by a self-educating nozzle. The mounted monitor set up can be supplied in several options for nozzle flows and inlet supply configurations to best fit the user's specific needs. The PHOS-CHEK line of standard foam trailers also incorporates two pre-connected foam hand lines that are perfect for small spot fires or reapplication of foam. These trailers come with plenty of storage space with multiple side compartments, over-the-fender boxes, and an A-frame compartment. Custom fender boxes are an option. All trailers are DOT compliant.

APPLICATIONS

The purpose of PHOS-CHEK's Foam Tote Trailers is to provide equipment that can be used as a rapid response apparatus to emergencies requiring firefighting foams. The ability to deploy and position a foam trailer to best fit fire conditions and wind direction, as well as the physical layout of the hazard area, will have a huge impact on the outcomes of emergency incidents and the effectiveness of foam application for extinguishment. This equipment also allows the user to adjust to changing conditions throughout the incident.

A-Frame Storage Compartment

Monitor with Self-Educating Nozzle

PHOS-CHEK® FOAM TOTE TRAILERS

STANDARD FEATURES

- Pre-piped monitor with self-educating nozzle flowing either 500 GPM, 750 GPM, or 1000 GPM
- Standard water piping is carbon steel with inlet connection: 5" storz
- Diamond plate operator platform surfaces
- All water and foam concentrate piping is run under the trailer to prevent tripping hazards
- DOT Compliance

OPTIONS
