

SOLID

CLASS A FOAM STICK

ENVIRONMENTAL INFORMATION

PHOS-CHEK SOLID CLASS A FOAM STICK does not contain any PFAS ingredients commonly found in fluorinated Class B foam concentrates.

HANDLING PRECAUTIONS

For detailed safety information, please refer to the SDS.

May cause irritation to eyes and skin

- **Precautionary measure** and first-aid handle in accordance with good industrial hygiene and safety practices. These practices include avoiding unnecessary contact and removal of the material from the eyes, skin and clothing.
- **Eye Protection:** As a good industrial practice, the use of chemical goggles is recommended. Eye flushing equipment should also be available. If in eyes, flush with plenty of water for at least 15 minutes.
- **Skin Protection:** Wear protective gloves to minimize skin contact. Wash hands and contaminated skin with plenty of water.
- **Respiratory Protection:** None required. Avoid breathing dust/mist.
- For complete SDS, visit www.phoschek.com

DESCRIPTION

PHOS-CHEK® SOLID Class A foam sticks produce fast, reliable Class A foam, without the need for expensive equipment. Firefighters can now have a fast, easy way to produce a low expansion foam, without a foam proportioner. PHOS-CHEK SOLID sticks produce a solution that lowers water's surface tension making it more effective in suppressing fire in Class A combustibles (wood, vegetation, paper and cotton products and rubber).

The PHOS-CHEK SOLID Class A foam stick is 1.1875" in diameter by 12" (305mm) long, and can be used with many different applicators that have been developed for this product. As water passes from the pump through the applicator, the stick will dissolve into the water flow providing a quick and easy low expansion foam solution with excellent wetting ability.

Now, any firefighter can have the advantage of Class A foam. This new PHOS-CHEK Class A foam product provides the user with a simple but effective method of producing a Class A foam solution that will spread and penetrate into porous fuels. A single stick will provide foam for 20-30 minutes depending on flow. When it runs out, simply put a new one in and you're ready to go.
