

# SOLBERG® FIRE-BRAKE PLUS™

## CLASS A FOAM CONCENTRATE

### DESCRIPTION

SOLBERG® FIRE-BRAKE PLUS™ foam concentrate is specially formulated to make water more effective for fire fighting. SOLBERG FIRE-BRAKE PLUS is a budget conscious Class A foam concentrate that compares favorably with other less concentrated Class A foam products.

The unique combination of surfactants significantly reduces water's surface tension and, when mixed with air, creates a foam blanket that surrounds fuels with a thick layer of water. This creates a barrier between the fuel and the fire, knocking down the fire faster than water alone, and allows fire fighters to see the areas of application. Making the water more effective reduces the amount of water needed to extinguish the fire reducing water damage and increases fire fighter safety through quicker knockdown and reduced mop-up/overhaul requirements. SOLBERG FIRE-BRAKE PLUS contains NO HAZARDOUS MATERIALS, is non corrosive, non-toxic, readily biodegradable, and has no flash point.

SOLBERG FIRE-BRAKE PLUS Class A foam concentrate does not contain PFAS chemicals including, but not limited to, PFOS or PFOA. Fluorinated surfactants are used in Class B foam concentrates and are necessary to form a film on flammable liquid fires. Class B foams should not be used on Class A fires. Never mix Class A and Class B foam concentrates.

### QUALIFICATIONS AND USES

SOLBERG FIRE-BRAKE PLUS is fully tested and qualified for use by the USDA Forest Service under Specification 5100-307b for all application methods including ground engines, Canadair water scooper aircraft, single engine air tankers (SEATS), and fixed tank helicopters. SOLBERG FIRE-BRAKE PLUS is compatible with fresh water, sea-water and long-term retardant. Foam characteristics are not affected by freeze-thaw.

SOLBERG FIRE-BRAKE PLUS meets the requirements of NFPA 1150. It is effective for use in Compressed Air Foam Systems (CAFS).

**HANDLING PRECAUTIONS**

- **For detailed safety information, please refer to the SDS.**
- SOLBERG FIRE-BRAKE PLUS concentrate is moderately irritating to eyes and slightly irritating to skin. Prolonged or repeated contact with the concentrate may produce skin irritation and inhalation of its mists may irritate the nose and upper respiratory system.
- **Eye Protection:** Goggles are recommended when handling concentrate. If in the eyes, flush immediately with plenty of water for at least 15 minutes.
- **Skin Protection:** Wear protective clothing and chemical resistant gloves when handling concentrate. Exposed skin should be washed as soon as possible.
- **Respiratory Protection:** None required. Avoid breathing mist or vapor.
- **Other Precautions:** Keep container closed. Use with adequate ventilation.
- These precautions and practices are similar to those used with any heavy-duty detergent.
- Water solutions of SOLBERG FIRE-BRAKE PLUS at use levels (0.1%-1.0%) are only minimally irritating, but should be washed from the skin as soon as practical, as drying and chapping could result from prolonged exposure.
